

The Office of Community Relations serves the mission of CHOP to help children live healthy, productive lives beyond the walls of our facilities. Our purpose is to connect CHOP employees and resources to the community, develop and grow existing community-based initiatives while also helping to develop new programs, and collaborate with our partners to help identify and meet the unique health needs of children in southeastern Pennsylvania and New Jersey. We do this by mobilizing employee volunteers, funding employee-led programs, and creating collaborations to target social determinants of health. We cannot do any of this alone, so we welcome all of our employees to join us in this commitment. Get started today, join our listserv and sign up to volunteer in the community.
